Junior Gold Miners: Underperforming/Volatile & Poor Commodity Tracking

Cumulative Returns ~ 16 Years to Sept. 30, 2025

Why do we bias away from deep cyclical?

1. Allows for greater confidence in long-term DCF models & longer holding periods to allow company strategies to play out – less guess-work & valuation matters
2. Delivers very low risk portfolios (std. dev., beta, risk-adjusted returns) with supporting dividend yield

Summary

Current Small Cap Opportunity

Catalysts:

1. Small Cap valuations are low vs. large cap – company fundamentals remain good (earnings, balance sheets)
2. A pullback in Gold prices will have a significant positive impact on relative performance
 1. Global uncertainty, wars led central banks to increase gold reserves
 2. Retail momentum buying ensued
 3. Peace agreements can serve to lessen the demand for gold & unwind the momentum trade
3. Rate moderation will benefit small caps (greater use of floating rate debt, M&A activity, dividend payers)
4. Lower global GDP growth + stagflation risk – this benefits small caps that are more capable of growing at much higher than GDP rates
